

ABSTRACT

The digital edition of the Glossarium Mediae Latinitatis Cataloniae (GMLC)

The GMLC carries out several lines of research that ultimately pursue a better understanding of the Latin written in Catalonia during the Early Middle Ages. Our main goal, however, is to transfer this knowledge not only to the scientific community, but also to the general public. In order to do so, we benefit from the multiple research possibilities offered by new technologies applied to Human and Social Studies. This paper presents the digital version of the dictionary and the advantages that such an edition can provide. We intend to explain why we have chosen a particular mark-up system, the several phases that constitute our working process and, finally, our future prospects.
